SUBJECT: ADDENDUM TO REQUEST FOR PROPOSALS - CONTRACT NO. **NAT11211-REEFCONCRT**  
**ARTIFICIAL REEF CONCRETE CULVERT/COMPLEX CONCRETE MATERIALS**  
**CONTRACTOR PROJECT**

**ADDENDUM #1**

Questions submitted:

**1. What type of material or items are being deployed? For example, is it new or used concrete pipe sections or new pre fab concrete culvert sections? Specs are not clear as to material or items being deployed.**

Materials being deployed should include new or not used (could be discarded from another project due to manufacturing defect, but must not have been used on another project) concrete and complex concrete materials, clean, and with a minimum of exposed rebar. Ideal items include concrete pipe sections, pre-fab culvert sections, junction boxes, and pre-cast manholes.

**2. Are items being pushed over edge of barge?**

We would prefer that the items be pushed over the edge of the barge. We would like the bid proposals to specify the equipment that the contractor would use to push the material off of a barge.

All other terms and conditions remain the same.

If you have any questions, please contact me at (302)739-4782 OR Janet.Dennis@state.de.us
